Summary

B.E. candidate with expertise in ML pipelines, NLP, deep learning, and Generative AI. Experienced in deploying classification models, recommendation systems, and agentic AI solutions using Python, TensorFlow, XGBoost, and LangGraph. Strong in neural networks and building scalable, production-ready AI systems.

Education

Institute of Engineering and Technology

Bachelor of Engineering (B.E.)

Indore, MP

2023 – Present

Kiddys Corner School

Class XII – CBSE | 82.8%

Class X – CBSE | 83.6%

Gwalior, MP

2021 – 2022

2019 – 2020

Projects

AI Chatbot | LangGraph, LLaMa 3.3 (Groq API), Streamlit, Python

Jan – Mar 2026

- Built a multi-threaded **agentic AI chatbot** using **LangGraph** with persistent conversational memory and state management.
- Integrated **LLama 3.3** via Groq API for real-time, context-aware response generation with streaming output.
- Designed a modular architecture using **state graphs, node-based execution, and checkpointing** for scalable AI workflows.
- Developed an interactive **Streamlit UI** supporting multi-chat sessions, dynamic conversation titles, and real-time rendering.

Student Dropout Risk Predictor | Python, XGBoost, Pandas, Matplotlib

Oct – Nov 2025

- Smart India Hackathon 2025 National Finalist Built an AI-driven student dropout prediction system using **XGBoost** and end-to-end ML pipeline.
- Achieved **90% ROC-AUC** using engineered academic and attendance features.
- Developed dashboard-ready visualizations across 10+ indicators for actionable insights.

Movie Buddy | Python, NLP, Scikit-learn, Streamlit

Aug – Sept 2025

- Built a content-based recommendation engine using **cosine similarity** across 5,000+ movies.
- Implemented end-to-end **NLP preprocessing** and vectorization using **CountVectorizer**.
- Deployed a real-time **Streamlit** web app delivering personalized recommendations with sub-second latency.

Technical Skills

Languages: Python, Java, SQL

Machine Learning: Classification, Regression, Ensemble Methods, Neural Networks, CNNs, RNNs, Transformers, Model Evaluation, Hyperparameter Tuning

Generative AI & LLMs: LLMs, Prompt Engineering, LangGraph, LangChain, Agentic Systems, Conversational AI, Context Management

Libraries & Frameworks: Scikit-learn, XGBoost, TensorFlow, Pandas, NumPy, Streamlit

Databases & Storage: SQL, Vector Databases (basic), Data Pipelines

Tools & Engineering: Git, GitHub, Jupyter Notebook, VS Code, ML Pipelines, Debugging, Version Control, Claude

Certifications & Achievements

Smart India Hackathon 2025 — National Finalist — Top 1% nationwide.

LeetCode — Solved 200+ DSA problems across core data structures.

Deep Learning Specialization — Andrew Ng, Coursera (CNNs, Sequence Models).

Machine Learning & Python Certification — Code With Harry.
